Implementation at ACME Corp

ACME Corp stores user data and associated consent information, including an Identifie. To comply with data privacy regulations, ACME regularly checks if the user has revoked consent using its SSI. This ensures that data is handled in accordance with the user's wishes. It's important to note that ACME doesn't control the SSI; it's owned and managed by the user.

Good to know for Alice

Alice downloaded her SSI, which gives her full control over her data and consent. She can revoke consent at any time by using her SSI. However, it's essential to understand that revoking consent doesn't immediately delete her data. ACME must process her revocation request and update their systems accordingly. This process might take some time. By maintaining control of her SSI, she ensures her data privacy rights are upheld.
